WHY FOOD?

Food is the first and foremost necessity of a living being which is necessary for proper day to day living of a human being. Every individual must have at least. Almost 20 crore people in India go hungry every day. This is prevailing even with the high quantity of food sources available. Many people could not get in reach with those sources at various circumstances and do not have an easy access to them.

WHO TO PROVIDE?

In Hospitals, the patients will be accompanied by their close one, relatives, and friends. The day to day care of the patients will be taken care by the hospitals with their doctors and nurses. And the By-Standers who plan for their stay with their loved ones would have come prepared for a certain number of days. But due to unavoidable circumstances they would have been staying for additional number days. During this situation many would be facing troubles in circulating the amount of money they have for stay, travel, medicine etc. If food is provided for them, then it would reduce their burden, financially to a certain extent also providing a healthy complete meal, a stress-free and straight access.

HOW PEOPLE ARE BENEFITED ?

The food packets provided to the by-standers during the lunch hours are highly beneficial for them, with the supply of the packets at free of cost. The people are highly benefited from this initiative and the patients who are provided with bread packets (especially in the labour ward) find these programmes highly helpful. This Chandrans Yuva Foundation's initiative makes this probable by getting supply of food nearby and accessible to these people. This will make sure that their works doesn't get affected and they can get a meal in their busy time. This is happening on a day-to-day basis which can be easily organized by bringing the access to them directly. This is the core belief Chandrans Yuva Foundation, to bring people who are in need of a meal, a stress-free and straight access.

Chandrans Yuva Foundation has been providing Food for the Needy, Taking care of the Medical Needs of the Tribal Village People for the Past 4 Years in and around Coimbatore. With the continuous endeavor, we have come across a panic situation in Coimbatore due to the COVID-19 Outbreak.

We have been feeding the people, specially By-Standers in Government Hospitals around Coimbatore with a hygienic and healthy meal on a regular basis.

With the impact of COVID-19,

- 1. By Standard in Hospitals
- 2. Homeless Stranded patients in Government Hospitals
- 3. People who used to work for Daily Wages
- 4. People without proper Shelter
- 5. People in the underdeveloped areas

The above people have taken a huge impact with respect to the quantity and quality of the food they receive. We are extending our hands and support towards them in the coming days and started providing 200 packets of Food every day.

Day By day, Funds are becoming insufficient as requirement gets higher due to

- (I) Demand
- (ii) The number of people in need of the Essential Necessity.
- (iii) Logistic Difficulties

Hence, we are requesting your valuable Support in order to help our people to cross this situation with Hands Together.

"Beautiful things come together one stitch at a time" FOUNDER

It is definitely hard to see kids and women in rags along the roadsides. In a well cultured society as ours, clothing has become an essential. Clothing is nothing but stitches and colours. A few stitches along the edges on a piece of cloth and some printing or colouring material will bring out a perfect wearable for anyone. At this point, we have look through the situations faced by a visually challenged person. The privileges received by them will give them an entirely different view on these stitches and colours of clothing, has set up special facilities and care under its initiative to motivate and bringing out the hidden talents and training the visually under-privileged people in the field of basic designing, decided to make a solid and collaborative bridge between the colours of clothing and colours of the visually under-privileged. Those special people, they are capable to see a different spectrum of colours, which cannot be seen through any other pair of eyes.

"There are no Dis-able people there are only Differently able people"

DIFFERENTLY ABLE PEOPLE

There has been a strong belief in our world that, physically challenged people can do only certain works and can cultivate only limited amount of talents. But in Chandrans Yuva Foundation, we do not consider anything as a disability, but we identify it as a different ability and help them to develop their skills in the particular fields.

BAKERY PRACTICES TRAINING

In Chandrans Yuva Foundation, everything small done for the beneficiaries will have a larger scope for them to capitalize on. The differently able people who are associated with our Chandrans Yuva are been trained in actual bakery setups, where are been taught to make bakery products including pastries, chocolates, packaging and other necessary exercises.

WHY BAKING?

Baking is considered as a professional occupation which is prevalent widely throughout the world. The market for the baking industry always increasing or steady. With the cultivation of knowledge in such a diverse and efficient industry, the differently able people will be exposed to a wide range of opportunities which will be available for them to take grabs.

WHAT MORE?

Chandrans Yuva Foundation can back them by assisting them and propelling them in the competitive world with the sufficient talentsand practices to handle a full-fledged bakery setup on their own

Hey its nature cuz
you feel it when you feel it

There are people, who are very much eager to get into something which will please them financially still they feel hesitant about the economical part. To be successful financially, the products has to be used everyone who they can access and must be able to be accomplished by themselves without any huge investment. When going organic with the consumer durables, the materials used will be collected from the local farmers, it will be environmentally friendly, better for the health for children and adults and finally it will feel better.

With these benefits and the only major need to implement is One's Interest, underprivileged people, people with less financial attention can be provided with this opportunity to make use of these sources for accomplishing the tasks of Manufacturing Organic Durables BY: Specially Challenged People's Interest

"In the end, it's not the year in your life that count. it's the life in your year".

The most essential necessity of a human being which the world is running towards, but struggling to keep under control is Healthcare. There are 2 sets of people, who know about their health condition and take corrective actions accordingly and then there are people who are completely unaware of their situation, not because of negligence but because of unawareness. In order to make those people aware of the happenings and the medical conditions, camps and checkups were conducted on places where it require medical attention.

We had invited few doctors to join with us on this initiative and they eagerly joint us to help the people in need. Yuva was reaching the places where even basic medical needs are rare and organized Health care camps providing free checkup and medicines for the people. General Health checkups to diagnose

"Education is everything, it is for everyone. We all need to be educated in something technically or skillfully".FOUNDER

The rise of unemployment is a major problem in the current day scenario. The people have to be trained up in specific skills which will co-ordinate with their talents so that they can adapt themselves to the atmosphere better. This adaption to the skill atmosphere will bring out the best in the people. The Community College Training centres will focus majorly on the skills development of students, people, in the way the world wants them to be. Children now a days prefer to be indoors for their day to day activities and programs. The amount of children who are willing to go outdoors and get them involved in playing outdoor sports are getting reduced. The Children nowadays are in the requirement to build themselves a wide range of skills to sustain in the future. The children have to be exposed to those skills at the very beginning itself. And the bottom line is the children have to more workout both physically and mentally.

In order to make them charged up, they have to be more energetic and so it is required for them to get engaged in outdoor sports which will keep their energies boosted and also will make sure they develop a lot of potential, teamwork, hard work.

EVENT HELD ON INTERNATIONAL WOMEN'S DAY

MARCH 8 - 2020

Chandrans Yuva Foundation ha has always been a Frontrunner in identifying and motivating Women in different fields and activities and help them to achieve their goals. This year we decided to Encourage Women Entrepreneurs in their fields of Activities.

With the help of them, many women who unemployed, divorcees, women below the poverty line, can have changes in their lives as they can understand them and their families much better than anyone else

The encouragement comes in the form of the amount of time that they allocate in Social Consciousness initiatives they try to spend in the world around them like their friends, family, workers, employees, contractors, people around their business place and residence.

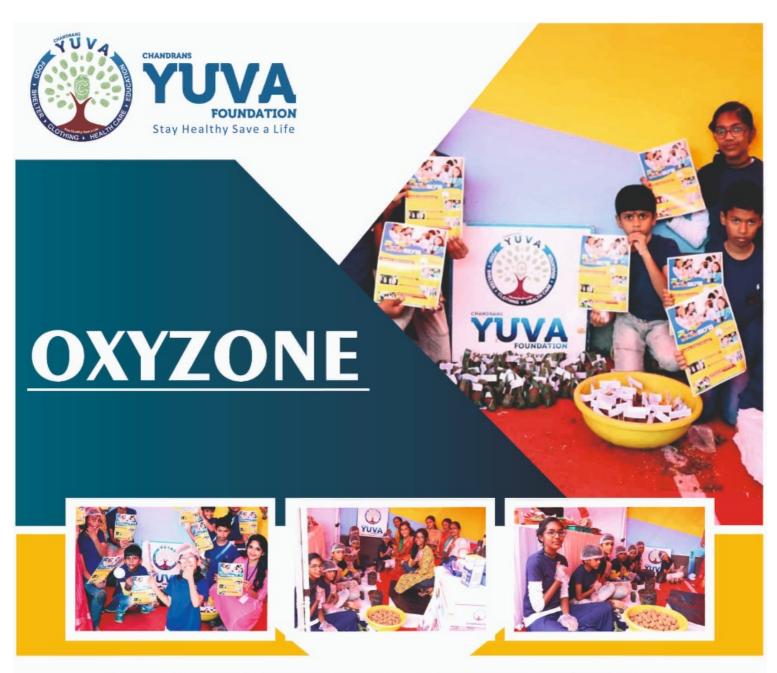

Chandrans Yuva Foundation has always believed Entrepreneurship Thrive among Students is very much necessary to lead our society from the front. We come up with motivational and awareness speeches regarding the same among College going Students. At such gatherings in PSG College of Arts and Science, Our Team had created awareness among the students about the opportunities which are available in their career and highlighted the importance of Technology in making the necessary applications to develop the skills.

DECEMBER 12 - 2019
